FLEET & SURPLUS

Notes from Fleet Forum – March 12, 2008

- SUU does not have a Toyota or Honda dealership for the hybrid vehicles. They would have to drive to St. George to get them repaired. Is there a way for them to be exempt?
 - Sam Lee stated if you have situations where the hybrid will not work for you please contact Anne Stehno and let her know.
- Can Higher Education use the AFV money they have been paying for the additional expense incurred when buying hybrids?
 - Margaret Chambers stated she would look into the matter to see if there is any money left.
- Toyota Hylanders hybrids are not recommended for off-road use. Is there a different choice if our business requires off-road use?
 - Sam Lee stated they would look to see what Toyota's recommendation is.
- Mileage audits should be changed to quarterly. It is too much work to look at it monthly.
 - Fleet will look at changing the audits to a quarterly report.
- Can there be a report on the web which shows operators who's drivers license is about to expire?
 - Fleet will create the report and have it posted on the web within a month.
